

GREGORY OPERTO, Ph. D.

32 year-old, French citizenship

goperto@fpmaragall.com

Phone : +33 6 33 89 36 22

LinkedIn : <http://linkedin.com/in/neuroimaging>

ResearchGate : http://researchgate.net/profile/Gregory_Operto

Grégory Operto has been involved in neuroimaging since 2004. After graduating in 2005 from the Ecole Supérieure d'Ingénieurs de Luminy (now Polytech-Marseille) with a major in Biomedical Engineering, he received his PhD in Computer Science from Aix-Marseille University in 2009. He then joined NeuroSpin, the high-field MRI center of the Commissariat à l'Energie Atomique (Atomic Energy Commission). His research interests focus on brain intersubject variability in adults and early development, and more recently the aging brain and neurodegenerative disorders using large cohort studies. Between 2011 and 2016, he managed the production unit in charge of computing biomarkers in CATI, the French platform for multicenter neuroimaging studies. His research interests include brain intersubject variability in adults and early development, and the aging brain using large cohort studies. He is now holding a research associate position in the neuroimaging team of the BarcelonaBeta Brain Research Center to explore imaging early markers of Alzheimer's disease in large cohorts of presymptomatic subjects.

QUALIFICATIONS

10-year experience in neuroimaging and brain data analysis
Design, implementation and production management of multi-site dataflows (data transfer, processing, quality control, communication)
Advanced knowledge of the Python language (software development and scientific computing)
Extended experience in managing large databases, big data processing and analysis in research
Excellent communication skills. Participations at international conferences and meetings, articles as first and co-author.
Supervision of students and engineers

PROFESSIONAL EXPERIENCE

Postdoctoral researcher at BarcelonaBeta Brain Research Center – Pasqual Maragall Foundation (supervisor: J-D. Gispert, PhD), Barcelona (2016 –)
Postprocessing and analysis over massive MRI datasets, large-scale production of imaging biomarkers in the scope of Alzheimer's disease

Research Engineer / Production Manager in CATI (director: J-F. Mangin, PhD), NeuroSpin (2011–2016)
Creation of a national infrastructure for the support of cohort studies on Alzheimer's patients and related dementias (<http://cati-neuroimaging.com>).
Multi-site coordination of analyses performed on massive collections of images.
Member of the project executive committee.
Supervision of a software development team (3) focused on quality control.
Frequent interactions with teams in charge of national and international research projects.
Supervision of training engineers (2).

Postdoctoral Research Fellow in NeuroSpin CEA Saclay, France (2010–2011)
Working on classification and computer vision methods for the study of the cortical folding process and intersubject variability in developing brain.
Supervision: J-F. Mangin, PhD

PhD Student – Graduate Teaching Assistant, Université Aix-Marseille (2005–2009)
Doctoral training in neuroimaging (Laboratoire des Sciences de l'Information et des Systèmes)
functional magnetic resonance imaging, computer vision, machine learning, classification, machine learning, optimization

Training Engineer, Neurology Department 1st Medicine Faculty, Charles University, Prague, Czech Republic (2004)
Design of a video movement detection system during the acquisition of fMRI data – Application to studies in fMRI and repetitive transcranial magnetic stimulation (rTMS)

EDUCATION	<p>Ph.D. in Computer Science – Université Aix-Marseille, 2005–2009 Thesis: Structural surface-based analysis of fMRI data Supervision: Dr. Olivier Coulon, Ph.D – Prof. Rémy Bulot, Ph.D</p> <p>Master's degree, Digital Imaging – Université Aix-Marseille, 2004–2005 Thesis: From a gyral parcellation to a cortical surface parameterization Ranked 1st of promotion</p> <p>Diplôme d'Ingénieur (Biomedical Eng.), 2002–2005 Polytech-Marseille</p>
TRAINING	<p>Neuroanatomy (~ 50 hours) – Pr D. Hasboun – Université Pierre et Marie Curie, Paris – 2013–2014</p> <p>Agile software development (Scrum) (~ 20 hours) – Valtech – 2014</p>
LANGUAGES	<p>French (native), English (full professional proficiency), Spanish (limited professional proficiency), Italian (elementary proficiency)</p>
COMPUTER TECHNOLOGIES	<p>Extended knowledge of the Python language and scientific computing in Python – Knowledge of C/C++, Java Databases (Sqlite, Postgresql) and web (server/client, HTML5) Experience in big data technologies (machine learning, parallel computing, scalable databases) Enthusiast Git/GitHub user Experience in agile project management (Scrum) and software architecture design – Enthusiast about code quality Experienced Linux system administrator since 2004.</p>
NEUROIMAGING SOFTWARE	<p>Statistical Parametric Mapping (SPM), FreeSurfer, BrainVisa</p>
TEACHING	<p>Computer Science, Algorithmics, Visualization in Scientific Computing, Geometric Modeling, Pattern Recognition, Image Analysis, from 2005 to 2009, Faculté des Sciences de Luminy, Aix-Marseille University</p>
SUPERVISION OF STUDENTS	<p>Pauline Bezivin (2012 ; co-supervised Master student) Samuel David (2014 ; supervised Engineering student) Alberto Redolfi (2014 ; co-supervised Ph.D candidate)</p>
REVIEWER ACTIVITY	<p>International Symposium on Biomedical Imaging Neuroimage Organization for Human Brain Mapping (OHBM) annual meeting</p>
RESEARCH INTERESTS	<p>Intersubject variability Computational anatomy Cortical folding process, brain development, cortical morphology Aging process and neurodegenerative diseases Imaging markers Multisite studies Optimization of image processing dataflows over large cohorts Quality Control on large databases</p>
PROFESSIONAL INTERESTS	<p>Machine learning Computer vision Software development in research</p>
HOBBIES	<p>Travels (Iceland, Norway, Hawaii, among the most recent)</p>

Lightweight hiking, long-distance trekking (hiking solo without assistance from Marseille to Italy in 2012, across Mallorca in 2014, across the southern Alps in 2015)
Hacking (Raspberry Pi, Arduino, attending BrainHack hackathons)
Aikido, climbing, running (2 half-marathons per year since 2010)
